

NINGBO YSK PRECISION MACHINERY CO.,LTD.

688-ZZ Plastic Injected Roller Bearing

Definition :

Plastic-Coated Bearings Generally Refer To A Layer Of Plastic On The Outer Bread Of The Bearing. The Plastic Materials Are Generally Nylon PA, Polyoxymethylene POM And Engineering Plastics Polypropylene And Pp. Outsourcing Plastic Has Certain Hardness, Impact Resistance, Friction Resistance And Certain Self-Lubricating Type.

6001-2RS Rubber Sealed Ball Bearing

Product Advantages:

1. Strong R&D Capability And Comprehensive Product Line
2. 34 Main Production Lines And 2 Customized Production Lines
3. Advanced Production Equipment And Laboratory Equipment
4. Productivity (Daily) 200,000 Sets, 180,000 Grinding And Automatic Assembly 165,000.
5. On-Time Delivery Capability, The Error Is Within 3-5 Days
6. Multiple Cooperation Projects With 2 Research Institutions And University Research Institutes.

MR106ZZ Mini Bearing With Shield

Product Advantages:

1. Strong R&D Capability And Comprehensive Product Line
2. 34 Main Production Lines And 2 Customized Production Lines
3. Advanced Production Equipment And Laboratory Equipment
4. Productivity (Daily) 200,000 Sets, 180,000 Grinding And Automatic Assembly 165,000.
5. On-Time Delivery Capability, The Error Is Within 3-5 Days
6. Multiple Cooperation Projects With 2 Research Institutions And University Research Institutes.
